Equinox<sup>®</sup> Planning App

Surgeon focused. Patient driven.<sup>™</sup>

The CT-based Equinoxe® Planning App software immediately reconstructs the scapula in 3D, enabling implant selection and placement prior to surgery.

The immediate reconstruction feature provides the 3D view after a few steps and within minutes, allowing surgeons to start planning instantly using the Planning App's intuitive interface.

All Equinoxe glenoid implants are available for planning.

Available for MAC and PC.

To unlock the full advantage of the Planning App, use it with the only globally launched shoulder navigation technology available. The ExactechGPS® Shoulder Application is designed to reproduce the preoperative plan with precise execution intraoperatively. The system provides live feedback, allowing surgeons to control adjustments to the surgical plan in the O.R.

The Equinoxe® Planning App is manufactured by Blue Ortho and distributed by Exactech, Inc.

Exactech, Inc. is proud to have offices and distributors around the globe. For more information about Exactech products available in your country, please visit [www.exac.com](http://www.exac.com).
