

Stemless in 3D

equinox[®]

Stemless Shoulder System - Laser

Exactech[®]

The Equinnox® Stemless Shoulder is a bone conserving prosthesis designed for anatomic total shoulder arthroplasty.

INTRAOPERATIVE FLEXIBILITY

- Standard and augmented glenoid options
- The novel cage glenoid features a press-fit center bone cage and three cemented peripheral pegs.
- Multiple humeral head heights for each diameter for optimal soft tissue tensioning

SIMPLIFIED TECHNIQUE

- Fewer surgical steps designed to reduce operative time.

REVISION FRIENDLY

- Removal tool slots for efficient extraction
- Bone conserving prosthesis

3D-PRINTED POROUS STRUCTURE

- 3D-printed porous structure with optimized pore size, count and porosity designed for biologic fixation.
- Unique laser 3D-printed bone cage designed to promote bone-through growth.

LOW-PROFILE COLLAR

- Low-profile circular collar designed to maximize bone coverage

STABILITY & FIXATION

- Tapered finned cage is designed for initial fixation and rotational stability.

Exactech, Inc. is proud to have offices and distributors around the globe.
