Introducing Equinox[®] Ergo[®] Instrumentation

Building on nearly two decades of clinical experience with the Equinox[®] Shoulder System, the industry's fastest-growing shoulder, Exactech introduces the new Ergo[®] Instruments, which showcase the innovation that is central to the Equinox system's success.

Designed to be ergonomic, for a comfortable and secure grip

• **User friendly and intuitive**

- Fewer parts with multiple functions
- Shoulder-specific retractors included in every set
- Modular parts intended for easy assembly and are adaptable to surgeon's preferences

Organized for efficient surgical flow, with a minimal number of trays

- Only three trays for a reverse total shoulder arthroplasty procedure; only 2.5 for Preserve (short stem) case
- Ideal option for outpatient surgery; 50% reduction in trays, decreasing the cost per case

They redefine the status quo and they are all new, created in alignment with the Equinox[®] modus operandi. Equinox = innovation. Ergo, Equinox.
