TRULIANT®

Surgeon focused. Patient driven.™ **Exactech®**

The Rest Is In Your Hands.

With the demand for total knee arthroplasty continuing to grow, we know you are challenged to deliver excellent clinical outcomes with ever greater efficiency. The Truliant® Knee System is a high performance, comprehensive platform that offers solutions to address clinical challenges in primary and revision total knee replacement. Leveraging Exactech's core principles, Truliant applies advanced design philosophies and surgical technologies to help you deliver reproducible clinical outcomes in a streamlined procedure.

Some Ideas Just Click.

Blending design and technology, Truliant is designed to provide an efficient and reproducible surgical experience through the following features:

- Accents to indicate touch points for adjustability and functionality
- High-contrast markings for easy identification of settings and parameters
- Textured grip to accommodate mechanical and functional needs
- Intuitive design provides visual, audible and tactile feedback

- A** Touch points
- B** High-contrast markings
- C** Responsive dials
- D** Texturing

An Extension Of Yourself.

Truliant provides the versatility to meet your needs for each case, effortlessly aligning with your surgical protocols.

Easy intraoperative adjustments along the full continuum of care, from your simple primaries to your most complex revision cases

Instrumentation organized in four trays for improved ease of use and surgical efficiencies

Simple transition from mechanical instrumentation to computer-assisted surgery

Anatomically Aligned.

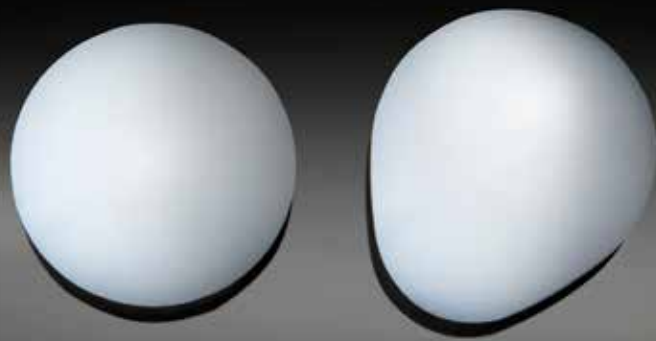

Accommodating a wide array of patient anatomies, Truliant offers a comprehensive suite of primary and revision implants.

Contoured femoral profile

Increased blend radius on the trochlear groove

Advanced and standard patella options

Implant options to meet your most challenging cases, including metaphyseal cones and offset couplers
