

DYNAMIC | PERSONALIZED | REPRODUCIBLE

# NEWTON

balancing bodies in motion

Reproducible balance is achievable.<sup>1</sup> Introducing the Newton Knee, a dynamic platform of cutting-edge technology and forward-thinking implants that are designed to provide optimal balance in a reproducible way.

The future  
starts now.

# NEWTON

balancing bodies in motion

## DYNAMIC

Active balance data captured through the entire arc of motion with the patella in place<sup>1</sup>

## PERSONALIZED

Implant placement that meets the needs of the patient. Not the other way around.

## REPRODUCIBLE

Quantifiable soft tissue data helps you execute your surgical plan with precision.<sup>1</sup>
